Note: A permit to take golden eagle nests is available only to parties engaged in a resource development or recovery operation and only when nests are inactive. Please make sure you attach a copy of your State permits, as requested in C.2. on page 1 of this application.

Please provide the following information on a separate sheet of paper:

1. Describe the resource development or recovery operation in which you are engaged.
2. Indicate the number of golden eagle nests you propose to take.
3. Describe the property on which the taking is proposed, with reference made to its exact geographic location. An appropriately scaled map or plat must be included which delineates the areas of the resource development or recovery operation and identifies the exact location of each golden eagle nest you propose to take. The map or plat must contain enough detail so that each golden eagle nest proposed to be taken can be readily located by the Service.
4. For each nest you propose to take, calculate the area nesting population of golden eagles and identify on an appropriately scaled map or plat the exact location of each golden eagle nest used to calculate the area nesting population. (This is not required if the Service has sufficient data to independently calculate the area nesting population.) The map or plat must contain enough details so that each golden eagle nest used to calculate the area nesting population can be readily located by the Service.
5. Describe each activity to be performed during the resource development or recovery operation which involves the taking of a golden eagle nest.
6. Provide a statement with any supporting documents from ornithologists experienced with golden eagles or other qualified persons who have made on-site inspections and can verify your calculation of the area nesting population.

Mitigation measures may include reclaiming disturbed land to enhance golden eagle nesting and foraging habitat, relocating in suitable habitat any inactive golden eagle nest taken, or establishing one or more nest sites. If the establishment of one or more nest sites is proposed, provide a description of the materials and methods to be used and the exact location of each artificial nest site.
10. You must retain records relating to the activities conducted under your permit for at least 5 years. Provide the address where these records will be kept. Provide the address where records of the permitted activities will be kept.
